

+-----+
| Public-Access Computer Systems Review no. 1, 1 (1990):
| addendum.
+-----+

+-----+
| Printing the PACS Review on a PC
+-----+

To print the PACS Review on a PC:

- (1) Request each article file by sending a GET command to LISTSERV@UHUPVM1. The list server will send an e-mail message that tells you if your request was successful. If it was successful, the list server will send the file directly to your account (the file is not sent as an e-mail message).
- (2) "Receive" each file, storing it in your computer account. On a VM/CMS system, use the "RL" command to see if the file is in your reader, and use PF9 to receive the file.
- (3) Download the file to your PC using Kermit or another file transfer package.
- (4) Import the file into your word processor as a text file. If you use WordPerfect, do not change the hard carriage returns into "soft" returns.
- (5) Set the margins to 1" left and 0" right.
- (6) Set your font to Courier 10 pitch and 12 point.
- (7) Use a global search and replace function to replace "+ Page" with "[Hard-Page Break]+ Page", where "[Hard-Page Break]" represents a word processor code that forces a page break.
- (8) Print.

+-----+
| The Public-Access Computer Systems Review is an electronic
| journal. It is sent to participants of the Public-Access
| Computer Systems Forum, a computer conference on BITNET.
| To join the PACS Forum, send an electronic mail message
| to LISTSERV@UHUPVM1 that says: SUBSCRIBE PACS-L Your Name.
| (Put your first and last name where it says "Your Name.")
