TODAY'S Agenda

Choosing appropriate databases

Using PICO

Generating keywords

Identifying subject terms

Boolean operators

Working with results

Looking forward

Choosing Appropriate Databases

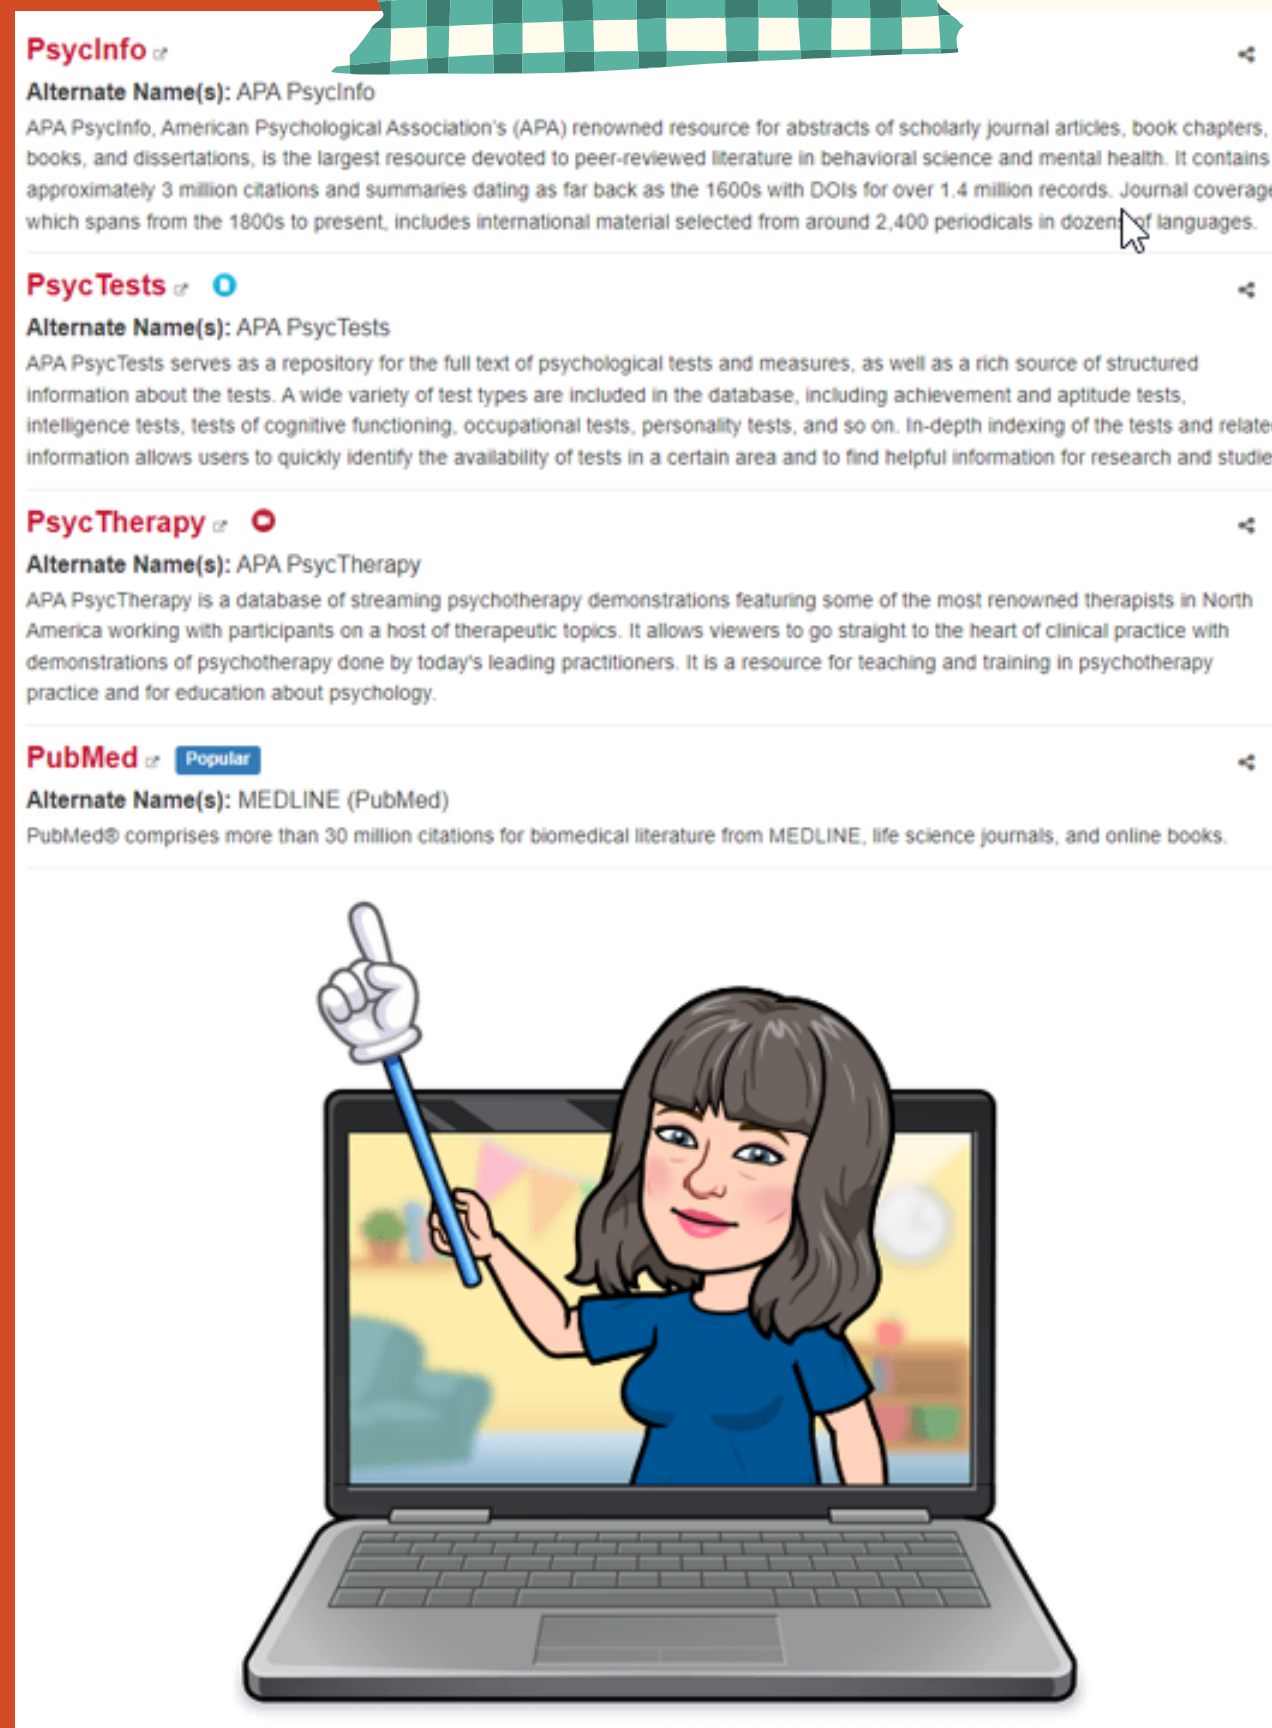

Will vary by question.

The classics:

- ✦ PubMed - Everything health & medical
- ✦ Embase - That, plus international, drugs, devices
- ✦ CINAHL - Nursing and allied health

Also consider:

- ✦ Is your topic interdisciplinary? Scopus
- ✦ Looking for the best way to teach something? Education Source
- ✦ Examining behavioral science/mental health? PsycInfo
- ✦ Grey literature

Using PICO

PICO is a tool to help us move from a question in sentence form to terms we can search in a database.

P	Patient, Population, Problem
I	Intervention, Independent Variable
C	Control, Comparison
O	Outcome

Example

Do interprofessional education (IPE)
activities improve health professions
students' attitudes toward
interprofessional collaboration?

Keywords

What do you call this object?

Keywords are terms that represent the main concepts you want to research.

Consider:

- ✦ Synonyms
- ✦ Spelling variations
- ✦ Umbrella vs. specific terms
- ✦ Acronyms

PICO

Moving from PICO to keywords - Do interprofessional education (IPE) activities improve health professions students' attitudes toward interprofessional collaboration?

Patient, Population, Problem	Intervention, Independent Variable	Control, Comparison	Outcome

PICO

Moving from PICO to keywords - Do interprofessional education (IPE) activities improve health professions students' attitudes toward interprofessional collaboration?

Patient, Population, Problem	Intervention, Independent Variable	Control, Comparison	Outcome
health professions students	interprofessional education		interprofessional collaboration
medical students	IPE		attitudes
nursing students	interprofessional learning		collaboration
optometry students			
pharmacy students			

MeSH

MeSH (Medical Subject Headings) is the NLM controlled vocabulary thesaurus used for indexing articles for PubMed.

"Anti-Bacterial Agents"[Mesh]

Emtree is Elsevier's authoritative life science thesaurus used in Embase.

exp antibiotic agent/

Boolean Operators

AND

- Narrows your search - Fewer results
- Use between different concepts

OR

- Expands your search - More results
- Use within one concept (synonyms)

NOT

- Excludes things from your search - Fewer results
- Use sparingly - May accidentally exclude relevant results

Boolean Operators

AND

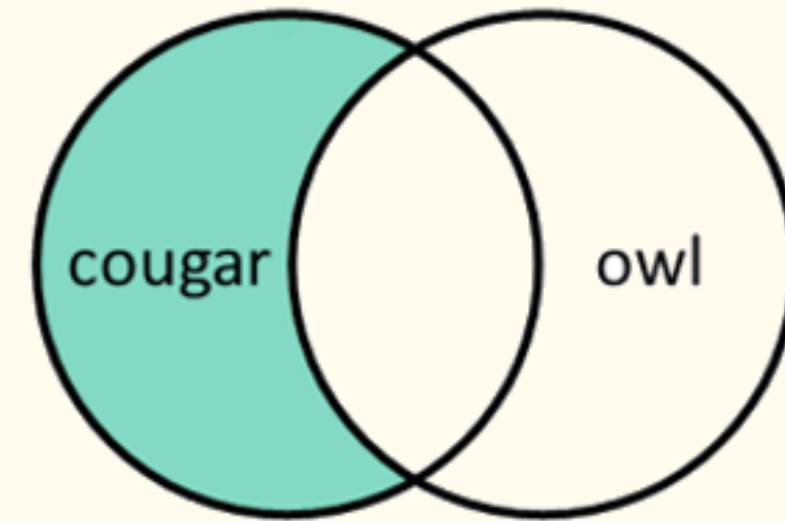

must include
both terms

OR

must include at
least one term

NOT

excludes
one term

Putting it Together

Example

Do **interprofessional education (IPE) activities** improve health professions students' attitudes toward interprofessional collaboration?

Patient, Population, Problem	Intervention, Independent Variable	Control, Comparison	Outcome
health professions students	interprofessional education		interprofessional collaboration
medical students	IPE		attitudes
nursing students	interprofessional learning		collaboration
optometry students			
pharmacy students			

(health professions students OR medical students OR nursing students OR optometry students OR pharmacy students) AND (interprofessional education OR IPE OR interprofessional learning) AND (interprofessional collaboration OR attitudes OR collaboration)

Working with Results

You executed your search... now what?

Use database limits / filters. These are almost universally located on the left side of the results list.

- ★ Date
- ★ Methodology
- ★ Publication type
- ★ Language
- ★ Subject, Journal, Author, etc.

Adjust the display

- Sort by relevance, date, author...
- Number of results shown per page
- View summaries or abstracts

Save / export results

- Email to yourself (or a friend)
- Export to a citation manager
- Use the “cite” button

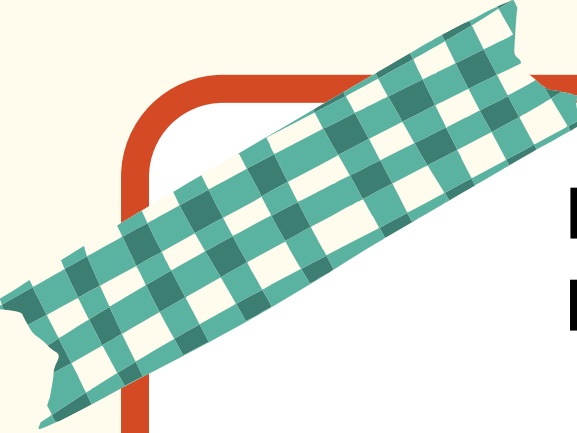

Access Full Text

Access databases through the library website or approved link.

A-Z list of databases:
<https://guides.lib.uh.edu/az.php>

PubMed: <https://libraries.uh.edu/pubmed>

Look for the “UH Find this Item” button:

Login with your Cougarnet when prompted

Use InterLibrary Loan (ILL) if we don't have it

We can typically get you a PDF pretty quickly
Don't pay for articles!
Can also be used for print materials
